INTERNATIONAL STANDARDS ORGANISATION (ISO)

CO-ORDINATION OF RESPONSE FROM BAT COMPANIES

Earlier this year an attack was made against Barclay and the ACTRON technology within the Swiss National Bureau of Standards. The notes attached give details of the attack and the response which was used to defeat it.

These events demonstrate the need for BAT to prepare for the next meeting of ISO. As last year, I will be contacting companies in countries where the National Standards Committee have an input to the relevant committee (TC126), i.e. P or O member status.
