Dear Dr.Evelyn,

FILTRONA MACHINE 300/302

I have been in touch with our lawyer on the matter of the variations in the deliveries given by the two above-mentioned machines.

His view is that in order to guarantee our legal rights (good faith) vis-à-vis the figures we print on packs, and which are based on the 302 machine, we should obtain from Filtrona a letter confirming that the 302 machine is technically more advanced than the 300 model.

I discussed this subject with Dr.Blackman last Wednesday in Basel and I would be very grateful if you could ask Filtrona to provide us with such a confirmation.

Yours sincerely,

W.Fankhauser
