

Note to Dr. L.C.F. Blackman:

22nd June, 1984

GR&DC REVIEW MEETING: 11TH-15TH JUNE 1984

1. Attached are :

- Paul Gannaway's handwritten notes on the Friday discussions
- My own aide memoire which I dictated directly after the Friday discussions
- Copies of Group Leaders' summaries of comments following each session
- Copy of German Priority listing
- Copy of R.A. Sanford's suggestions.

2. Stewart Massey and Iran Pedro will send us their priority listings; I have sent a reminder.

3. The delegates accepted the Group Leaders' summaries as being a good description of what was discussed at the sessions. I am now in the process of redrafting them to incorporate the comments from the Friday session.

4. I monitored the number of questions during the sessions from Monday to Thursday :

Sanford	:	37%	} 72% BMW
Reynolds	:	35%	
Wilson	:	< 1%	} 13% Canada
Pedro	:	1 question	
McBride	:	2%	} 14% Germany
Massey	:	11%	
Schneider	:	8%	
Heemann	:	6%	

5. I would rank the quality of the input from the delegates as :-

- Sanford/Reynolds : excellent
- Schneider/Heemann : good
(on their subjects)
- Massey/McBride : mediocre
- Wilson/Pedro : poor

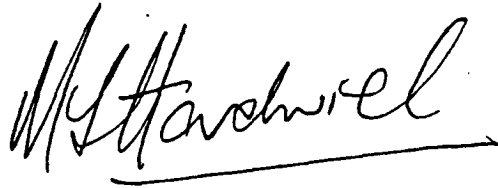

.../2

10997/1824

6. I make the suggestion that next year we run a Technical Exchange Meeting the week before the Technical Review Meeting.

In the first week, the delegates would visit the various groups in the laboratories to immerse themselves in the totality of the work. The second week could be a review, similar to this year's.

M.J. HARDWICK

A handwritten signature in cursive script, reading "M.J. Hardwick", with a horizontal line underneath.
