REF FH/SP/68.

DATE 18th September, 1972.

I am enclosing six copies each of three Progress Reports covering the period April to August, 1972. These reports describe our activities in the areas of Process Engineering Development, New Smoking Materials and Product Development.

In view of the content of the Product Development report, you may consider it wise not to give it a wide circulation at this stage.

Encs. 13
