Dear Mike,

~~D.J.W. 1/1/69~~  
H.F.D. 2/1/69  
C.L. 1/1/69  
H.H. 2/1/69

Please find enclosed the Report for March to September 1968, with some comments on possible future work. As you know this is the termination of the project in Dublin, as there appeared to be no-one interested in its continuation, the technician (Mary Nolan) being transferred to Jim Thomson in September..

The experimental details will follow as soon as I have written them up. I hope the previous report (February 1968) has arrived - did the second copy ever turn up? In the references to that report No. 67 should read: "R. Bonnett, W. Klyne et.al., J.C.S., 1966, (C), 2047."

May I take this opportunity of thanking Vic and yourself for the support of my research in Dublin, I believe Professor Philbin has written to Mr. L.C. Laporte.

With best wishes,

Yours sincerely,

J.G. Underwood
