L.C. Laporte, Esq.,
P.O. Box 6500,
MONTREAL.

Dear Leo,

I enclose herewith copies of Report No. RD.189-R dealing with the contribution of lamina, CRS and PCL to smoke production measured in terms of tar and nicotine. This is an extension of our previous work to three component mixtures and the results confirm the findings made in earlier work using two component mixtures.

A further report on this experiment, but dealing with the yield of 3:4-benzpyrene, will be issued shortly.

I hope you will find the report of interest.

Yours sincerely,

D. G. FELTON
