L.C. Laporte, Esq.,
P.O. Box 6500,
MONTREAL.

Dear Leo,

I enclose herewith copies of Report No. RD.186-R which deals with the effect of moisture content of cigarettes on smoke production. This is part of our general programme examining the effect of parameters on the burning characteristics of cigarettes, using the methodology of product efficiencies which we are developing. I trust you find this work of interest.

Kindest regards,

Yours sincerely,

D. G. FELTON
