Canada.

Dear John,

During Vic Runeckles' visit to R. & D. we discussed possible sources of C<sup>14</sup> labelled polycyclic hydrocarbons. The supply position in this country is non-existent, and, as you know, our existing sample of C<sup>14</sup> Benzpyrene came from your good self. This sample will last us some little time, but obviously I would like to be sure of our position in the future. Consequently, is it possible for you to supply us with further samples of Benzpyrene in the future and do you have any knowledge regarding sources of other labelled polycyclics such as fluoranthene, pyrene, etc?

I will be most grateful for any information you can give me on these matters.

Yours sincerely,

I. W. Hughes
