PROPOSALS FOR MONTREAL AGENDA

I enclose a list of topics for a possible agenda. These are the outcome of a discussion held at A. & D.C. between the senior members and group leaders, who were not informed of the proposals put forward by Mr. Laporte.

You will see that many of the items duplicate those in Leo's list. A notable omission is the consideration of Government activity in this field, which no doubt reflects the local situation in Canada. From our side we see the need for standardisation and the topics also show interest in the development field.
