Dear Andrew,

Please find enclosed a summary of the genotoxicity data from the condensates of cigarettes received from you.

Unfortunately the contract house we use suffered serious staff illness which delayed the UDS results.

Should you anticipate further samples I would probably recommend we only use the clastogenicity and UDS assays and would not use the previous contract house as the service is too slow. In addition, if you can let me know of potential future samples, we can pre-plan a speedy response to fit with your requirements.

Best regards,

Yours sincerely,

Dr. E.D. Massey.
