CANADA.

Dear Bob,

Metabolic Competitors

Firstly, I must apologise for the long delay in replying to your letter, which was mislaid and then delayed by the pre-Christmas rush and Wally's departure for Louisville.

Our general reaction is that this area should be covered by a "watching brief" and it would be valuable to have the information assessed from time to time.

At present we do not anticipate undertaking any work in this area, and if we were to consider possible biological tests we would attempt to measure activity, in the first instance, regardless of whether this was due to direct or indirect mechanisms.

Enclosed is a copy of some comments by John Underwood which includes some relevant references, and I hope that this will be helpful to Mike.

Yours sincerely,

J.R.E.
