Dr. Green
We agree - would you please
let Bob know what he wants but without
discussing anything else for BATV. - I think
the answer will be very obvious & I think
this case is to investigate!!

Dear Jim,

Thank you for your letter of July 16th. which I have discussed with our legal counsel. He has advised, and I must say we were of the same opinion, particularly in the light of the present stiffening of the atmosphere in Canada concerning industrial safety, that we should be as well informed as is possible about any potential hazards which may exist for the people who work in the menthol coating room. We would therefore appreciate receiving all available information on allowable concentrations of menthol in working atmospheres and the effects of menthol on people working in such atmospheres. Of course, we would be most grateful for assistance in the interpretation of this information.

We have not yet undertaken analyses of the air for menthol because we wanted to first learn if there is available information against which to judge the analytical data we might obtain.

We will appreciate very much receiving the information from Sam and any comments which he is able to make.

Yours sincerely,

(R.S.)
