Re: 1992 Key Area Papers

I refer to your note of 12 February 1992 and our subsequent discussions.

The public affairs Key Area Papers have now been reviewed. All papers, with the exception of that under the heading, "Smoking and Health - Health Warning Clauses", are still current. The "Health Warning Clause" paper will require a further review when the BAT group has fully resolved the matter regarding the extension of health warnings to all production.

As requested, I have noted this on the attached list.

The question of the environment (green issues) has been discussed and is being attended to by the environmental committee, chaired by David Stimson.
