November 30, 1961.

Mr. R. Duncan,
Fetherstonhaugh & Company,
Canada Cement Building,
Montreal 2, Quebec,

Dear Sir,

Re: Invention entitled "Treatment of Tobacco with Organic Solvents
in the Vapour Phase".

As agreed in our discussion on November 23, I am enclosing a schematic diagram of the apparatus employed in this laboratory for the treatment of tobacco with solvent vapours.

If it is necessary for the drawing to be presented on a particular size of paper, would you kindly advise us as to these requirements.

Yours truly,

E.L. Rice
E.L. Rice,
RESEARCH LABORATORY.
