Re. YOUR QUERIES ON 23mm CIRC CIG AND
DOQ -

SPOTTING/UNIFORMITY

1. DSN WOULD NOT ANTICIPATE ANY PROBLEMS
USING DOQ FOR MENTHOL APPLICATION
ON 23mm CIRC CIGS.
2. DANIEL CHAPPAZ IS HAPPY WITH DOQ
IN PRODUCTION. ONLY INCONVIENCE IS THAT
YOU NEED TO CLEAN UP M/C THOROUGHLY
AT THE END OF PRODUCTION AND LONG
STOPPAGE DURING PRODUCTION RESULTS IN
CRYSATILISATION
3. WE DO NOT HAVE CHANGE PARTS FOR 23MM
CIRC FOR PATRO TIPPING ATTACHMENT.
4. KIM (94 x 23.25 WITH 25mm FILTER, 28MM
TIPPING) IS MANUFACTURED IN GENEVA
ON MK8/MAX5 AT 2000 cpm.

REGARDS

TAJ HIRJI .
