Taj - re phone call from SKM.

2 questions.

1) Can we machine make at suitable speed could as follows?

100 mm total length with 25 mm filter at 23 mm are

84 mm ——— " — 25' ——— " — 23 ———

Sample quantities of say 5000 cgs per sample would be req'd by ITH Canada for marketing. — multiple samples.

ITH cannot get change parts til March 84

[Is there any info that Swiss can add re KIM or is it imported from Germany?

(2) With the Franco DOD ('all singing/dancing version') would we anticipate problems applying menthol (low/normal level) in terms of uniformity/spotting?

conc-
25 mm are
in alcohol
would be...
- loading...
by flow rate
is not...
problem.
getting...
in...
min...
v = cgs.

[What is the experience/view of this method of applic from a Op. Co - Swiss

Reply by telephone after 10.30 am Canadian time tomorrow or if suitable by telex.
