

# Registrant & Patient Information

---

Registrant and Patient Information include statistics on people registered with the Medical Services Plan (MSP). As not all registrants use MSP-funded services during a fiscal year, a distinction is made between registrants and patients.

The section includes counts of registrants by age group, gender and geographic area. Patient data includes counts, services and expenditure by patient age group, gender, geographic area, practitioner specialty and service code.

The statistics in this section are based on the criteria listed in the Methodological Notes section and as specified below.

## Registrant Counts

Registrants are counted once per fiscal year using the following criteria:

1. Only registrants with at least one day coverage within a fiscal year are included.
2. Patients with unknown gender and age are redistributed into 'Male' and 'Female' categories, and known age groups.

## Patient Counts

Patients are counted once per fiscal year using the following criteria:

1. Patients who were registered with the MSP of British Columbia.
2. Patients who received services from practitioners registered with the MSP of British Columbia.
3. Patients who received services with total payments (to practitioners) greater than 0 (zero) in the fiscal year.
4. Patients are assigned to the Local Health Area where payments for most services were received in the fiscal year. The patient's address is used as a proxy for location.
5. Patients with unknown LHA are assigned to "LHA Unknown".

6. Patients are assigned to one age group and gender per fiscal year based on their age group and gender with the highest total payments.
7. Patients with unknown gender and age are redistributed into 'Male' and 'Female' categories, and known age groups.

**Specialty**

Specialty used in Tables 11-1 to 11-3 and 16-1 to 16-3 is the specialty code on the claim, with no roll up of specialties.
