INTRODUCTION

The BC Palliative Care Benefits Program was developed to support individuals of any age who have reached the end stage of a life-threatening disease or illness, and want to receive medically-appropriate palliative care at home.

Through this program, B.C. residents who are eligible to receive palliative care services at home can:
- receive PharmaCare assistance with the cost of palliative medications
- access some palliative medical supplies and equipment from their health authority

ELIGIBILITY

The individual’s physician makes the determination as to a patient’s medical eligibility for palliative care benefits.

The program is available to all B.C. residents with active MSP coverage¹ who:
- are living at home²
- have been diagnosed with a life-threatening illness or condition
- have a life expectancy of up to six months, and
- consent to the focus of care being palliative rather than treatment aimed at cure.

For guidance in determining a patient’s medical eligibility, please refer to the Palliative Performance Scale (PPS) appended to the BC Palliative Care Benefits Program Application at https://www.health.gov.bc.ca/exforms/pharmacare/349fil.pdf. Eligible patients usually have a PPS score of 50% or less.

In some circumstances, patients with a PPS score of over 50% qualify for Plan P as long as they meet the eligibility criteria above.

PROGRAM BENEFITS

The BC Palliative Care Benefits Program has two components:
- PharmaCare BC Palliative Care Drug Plan (Plan P)
- Health Authority Palliative Medical Supplies and Equipment Component

¹ In some instances, PharmaCare may consider extending interim coverage to Canadian citizens/permanent residents who are new B.C. residents and do not yet have Medical Services Plan coverage.

² For the purposes of this program, “home” is defined as wherever the patient is living, whether in their own home or with family or friends, or in a supportive or assisted living residence or hospice that is not a licensed residential care facility covered under PharmaCare Plan B.
BC PALLIATIVE CARE DRUG PLAN (PLAN P)

The BC Palliative Care Drug Plan (Plan P) provides 100% coverage of the eligible costs of the prescription drugs and selected over-the-counter (OTC) drugs needed for care and treatment at home.

Medications covered by the plan include:

- prescription medications prescribed for pain, symptom control and improved quality of life; and,
- selected over-the-counter (OTC) drugs required to supplement the prescription drugs and considered to be medically necessary adjuncts for quality palliative care.

Medications covered are listed in the BC Palliative Care Drug Plan formulary. The most recent version of this formulary is available on the PharmaCare website at www.health.gov.bc.ca/pharmacare/outgoing/palliative-formulary.pdf.

Plan P does not cover items not listed in the plan formulary such as vitamins, herbs, nutritional supplements or medical marijuana.

To receive coverage of the OTC drugs in the Plan P formulary, the physician must write a prescription for the medication. This allows the pharmacy to enter the medication in the PharmaNet system, which enables PharmaCare to cover the eligible costs.

Note: Needles and syringes for administration of injectable medications are provided by the health authorities as medical supplies and equipment benefits.

BC PALLIATIVE CARE DRUG PLAN FORMULARY

The drug formulary defines which prescription and over-the-counter (OTC) drugs are covered under this plan.

The purpose of the drug plan is to provide patients receiving palliative care at home with access to the same palliative drugs they would receive at no charge if they were in hospital.

Medications are selected for inclusion in the BC Palliative Care Drug Plan formulary based on the following criteria:

- the prescription medication or OTC drug is prescribed for pain and symptom control; and,
- the prescription medication or OTC drug is prescribed to improve quality of life for palliative patients; and,
- provision of this drug to palliative patients supports and enables patients to remain at home.

Drugs not included in the Palliative Care Drug Plan formulary may be covered under the patient’s usual PharmaCare plan (e.g., Fair PharmaCare or, for recipients of B.C. Income Assistance, Plan C).

The most recent version of the formulary is on the PharmaCare website at www.health.gov.bc.ca/pharmacare/outgoing/palliative-formulary.pdf.
PAYMENT OF DRUG COST

When a drug or over-the-counter medication prescription for an individual registered for the BC Palliative Care Drug Plan is processed, the pharmacy enters a claim for the prescription on PharmaNet. PharmaCare will then pay the pharmacy directly for:

- drug costs up to the PharmaCare maximum price, and
- a dispensing fee (up to the maximum allowable dispensing fee).

BC PALLIATIVE CARE DRUG PLAN (PLAN P) COVERAGE FOR NEW B.C. RESIDENTS

BC Palliative Care Drug Plan coverage is available to new B.C. residents who have not yet qualified for the B.C. Medical Services Plan (MSP).

Patients do not need active MSP coverage but **do** require a B.C. Personal Health Number (PHN). A PHN can be assigned at any B.C. community pharmacy.

PharmaCare’s claim system, PharmaNet, cannot process claims for Plan P patients who are not enrolled in B.C. MSP. Plan P patients without MSP will have to pay for their prescribed palliative medications and submit the receipts to PharmaCare for reimbursement.

To request Plan P coverage for a new B.C. resident who does not have MSP coverage, use the usual application process:

- Ask the patient for their B.C. PHN.
- Submit a BC Palliative Care Benefits Program Application (HLTH 349) to
  - PharmaCare at the fax number provided at the bottom of the form, and
  - your local home and community care office (who will contact the patient to assess their need for palliative supplies and equipment).
- When PharmaCare has processed the application it will notify you and provide a Confirmation of Coverage letter for your patient. The Confirmation of Coverage letter explains to the patient that they should obtain MSP coverage as soon as they qualify and that, once their MSP coverage begins, PharmaCare will pay its portion of any eligible prescription claim directly to the pharmacy at the time of purchase.

WHEN PATIENTS DO NOT MEET THE BC PALLIATIVE CARE DRUG PLAN ELIGIBILITY CRITERIA

For patients who do not meet the criteria for the BC Palliative Care Drug Plan (Plan P), coverage options through other government insurers (such as Veterans Affairs Canada) and private insurers can also be considered.

Please note that individuals covered by the Non-Insured Health Benefits (NIHB) Program of Health Canada or Veterans Affairs Canada (VAC) require coverage under the BC Palliative Care Drug Plan only if a medication is not covered by NIHB or VAC.

Members of the Canadian Forces receive coverage through their employers and are, therefore, not eligible for this drug plan.
Patients should register for BC’s Fair PharmaCare plan at www.health.gov.bc.ca/pharmacare/fpcreg.html if they have not already done so. Fair PharmaCare covers PharmaCare benefits not included in Plan P.

**MEDICAL SUPPLIES AND EQUIPMENT BENEFITS**

This component is designed to provide individuals who are receiving palliative care at home with access to some of the same medical supplies and equipment they would receive at no charge if they were in hospital. The Ministry of Health funds health authorities to deliver this component of the BC Palliative Care Benefits Program.

Health Authorities provide medical supplies and equipment benefits at no charge to eligible palliative individuals based on need as assessed by the health authority’s designated health professional(s). Coverage includes access to certain medical supplies and equipment that support the delivery of safe palliative care at home.

Eligible patients are those who

- are in the last six months of their lives, and
- may potentially require care in a hospital if their palliative medical supplies and equipment are not provided.

A patient’s palliative needs are assessed on a monthly or more frequent basis. If it is determined that a patient no longer needs palliative supplies and equipment, he/she may then be charged for supplies and equipment provided by the health authority.

Health Authorities may provide equipment in a variety of ways, including arrangements:

- with medical supply companies for lease or rentals
- with organizations such as the Canadian Red Cross Health Equipment Loan Program
- for actual purchase of technology such as CAD pumps by a Community Health Services Society with a contract for repair and maintenance with the Community Health Council

A list of medical supplies and equipment provided by the health authorities is included in Appendix A – Medical supplies and equipment.

**HOME OXYGEN**

Subsidized home oxygen for all eligible patients, including palliative patients, is delivered through the Home Oxygen Program in each health authority. Home oxygen is not covered under the BC Palliative Care Benefits Program.

For more information, contact your local health authority’s Home Oxygen Program or visit HealthLink BC’s website at http://find.healthlinkbc.ca and, in the Find Services What? field, enter “home oxygen program.”
SUBMITTING AN APPLICATION

OVERVIEW

Once a physician has certified that a patient meets the medical criteria, the physician completes a BC Palliative Care Benefits Program Application (HLTH 349) and faxes it to both Health Insurance BC (for drug coverage) and the health authority (for assessment for palliative medical supplies and equipment).

PATIENT SIGNATURE REQUIREMENT

The Freedom of Information and Protection of Privacy Act requires that the patient or the patient’s legal representative consent to the release of personal information such as basic demographic data and diagnosis. For this reason, the patient or their legal representative must sign the application.

If a patient is unable to sign the form and has no legal representative (or the legal representative cannot be reached), a physician may act on behalf of the patient.

In these cases, physicians should:
- sign in the Signature of Applicant (or legal representative) field, and
- note “Patient’s physician” in the Relationship to Applicant field.

COMPLETING AND SUBMITTING THE APPLICATION

To ensure prompt processing, please complete all sections of the application form. Incomplete information will require Health Insurance BC and/or the health authority to return the form to the physician to obtain the missing information.

Please fax the application form to:
- Health Insurance BC at 250-405-3587, and
- the appropriate Home and Community Care office of the local health authority, as listed in the blue pages of your telephone directory. Please do NOT fax the application to a Health Authority’s head office. To find the contact information for the Home and Community Care office, visit HealthLink BC’s search site at http://find.healthlinkbc.ca and, in the Find Services What? field, enter “home and community care.”

ORDERING APPLICATION FORMS

To obtain a supply of printed forms (HLTH 349), please contact the Ministry of Technology, Innovation and Citizens’ Services:
- Sean Johnson | Phone: 250-952-4008 | Fax: 250-952-4559 | e-mail: Sean.Johnson@gov.bc.ca
- Alternative e-mail contact: Leigh.Campbell@gov.bc.ca

Please provide your address and the number of pre-printed forms you need.

The application form, this guide, a patient information sheet and the plan formulary are also available on the PharmaCare website at www.health.gov.bc.ca/pharmacare/outgoing/palliative.html.
ENROLMENT IN THE BC PALLIATIVE CARE DRUG PLAN (PLAN P)

Coverage under the BC Palliative Care Drug Plan begins as soon as Health Insurance BC (which delivers operational services for PharmaCare) processes the application and enters the information in the PharmaNet system. Please allow 12 hours for processing.

To confirm enrolment in the BC Palliative Care Drug Plan, the individual, physician or pharmacist may contact Health Insurance BC (HIBC). The public can contact HIBC at:

- 604-683-7151 (Vancouver and the Lower Mainland)
- 1-800-663-7100 (toll free, for the Rest of B.C.)

Once the application is processed, prescriptions can be filled at any pharmacy in British Columbia.

Benefits under the BC Palliative Care Drug Plan continue for as long as the person is diagnosed as requiring palliative care.

ENROLMENT FOR MEDICAL SUPPLIES AND EQUIPMENT BENEFITS

Once the health authority receives the application, health authority staff contact the individual or their family. Arrangements will be made for a home visit to assess both the person’s eligibility and equipment/supplies needs. Once the patient’s care plan and needs are confirmed, health authority staff will arrange for the provision of the approved palliative medical supplies and equipment.

PALLIATIVE CARE RESOURCES

PALLIATIVE CARE CONSULTATION LINE

Physicians throughout BC have access to a 24/7 toll-free phone line for palliative care consultation. The phone line is staffed by palliative care physicians who offer timely clinical advice on pain and symptom management.

For this physician-to-physician palliative care consultation, call 1-877-711-5757.

ADDITIONAL INFORMATION

GENERAL INFORMATION FOR PATIENTS AND CAREGIVERS

Patients or caregivers can consult the following for general information on the program:

- HealthLink BC (phone 8-1-1)
- Ministry of Health’s PharmaCare website at www.health.gov.bc.ca/pharmacare, for information about drug coverage and basic eligibility requirements
- Health Insurance BC from Vancouver at 604-683-7151 or from elsewhere in B.C. at 1-800-663-7100—for information on medications included in the formulary.
- Local health authorities—for information on medical equipment and supplies. See Health Authority Contact Information for details.
INFORMATION FOR PHYSICIANS

Special Authorities

Most drugs in the BC Palliative Care Drug Plan (Plan P) formulary are regular PharmaCare benefits; drugs not included in the Plan P formulary may be covered under another PharmaCare plan (e.g., Fair PharmaCare). However, if a drug that is not included in the formulary is needed to alleviate patient discomfort—and there is no substitute for that drug in the formulary—PharmaCare will consider a request for Special Authority Plan P coverage.

To request Plan P coverage of a medication not included in the formulary:

- Send a completed General Special Authority Request Form (HLTH 5328) by fax. The Special Authority Program fax number can be found on the request form. Fax is the quickest method.
- Clearly mark “For Palliative Care Registrant” on the request form to ensure it receives priority attention.
- Include adequate documentation with the request. A decision on coverage may be delayed if PharmaCare needs to call the physician and/or consultant for additional information.

Medical Supplies and Equipment

For information regarding medical supplies and equipment contact the Home and Community Care office of your local health authority.

Health Authority Contact Information

Home and Community Care offices of the local health authorities are listed in the blue pages of the telephone directory. Contact information may also be obtained from HealthLink BC (phone 8-1-1 or visit HealthLink BC’s search site at http://find.healthlinkbc.ca and, in the Find Services What? field, enter “home and community care.”
APPENDIX A - MEDICAL SUPPLIES & EQUIPMENT

Health authority staff assess the patient’s initial and ongoing eligibility and specific needs for palliative supplies and equipment and make arrangements for the provision of approved supplies and equipment.

MEDICAL SUPPLIES

Health authorities provide medical supplies to eligible palliative care patients at no charge based on assessed need.

Supplies to be provided to eligible patients include:

Routine dressing supplies

- sterile dressing supplies
- bandages, including elastic and adhesive, and tape
- trays (disposable or re-usable)
- solutions and ointments (unless covered by the Palliative Care Drug Plan component of the BC Palliative Care Benefits Program)

Medication administration supplies

- needles, syringes, swabs

Intravenous therapy and subcutaneous supplies

- hydration solutions: Normal saline, 2/3 & 1/3, D5W
- mini-bags, tubing, cathlons, syringes, needles, heparin locks and caps
- Hypodermoclysis equipment

Urinary catheter care supplies

- urinary catheter equipment including drainage tubing, drainage bags,
- connectors, leg bag drainage set
- catheterization tray
- disposable gloves (non-sterile)

Incontinence supplies

- incontinence briefs and pads
- condom drainage sets
- disposable gloves (non-sterile)
Medical supplies not approved under the Palliative Care Benefits Program:

- **ongoing diabetic supplies**—Covered by PharmaCare. Coverage is subject to the rules of a patient’s primary plan: Fair PharmaCare, Plan C (B.C. Income Assistance) or Plan F (Children in the At-Home-Program)—except blood glucose monitoring strips which are covered by the local health authority.

- **ostomy supplies**—Covered by PharmaCare. Coverage is subject to the rules of a patient’s primary plan: Fair PharmaCare, Plan C (B.C. Income Assistance) or Plan F (Children in the At-Home Program).

- **wound care ointments** requiring a prescription (see the BC Palliative Care Drug Plan formulary for these items).

---

**EQUIPMENT**

Health authorities provide equipment to eligible palliative patients based on assessed need and at no charge to the patient.

Equipment includes:

- hypodermoclysis equipment
- computerized ambulatory drug delivery (CADD) pump equipment, including cassettes and other approved pain control delivery technologies
- pressure redistribution mattresses
- mechanical lifts with slings – may include ceiling lifts with installation (client must have a Palliative Performance Scale score of 30% or less)
- commodes, transfer boards, bath seats, floor-to-ceiling poles, wheelchair shower chairs
- walkers
- non-motorized wheelchairs
- hospital beds (client must have a Palliative Performance Scale score of 30% or less)

Instructions: PPS level is determined by reading left to right to find a ‘best horizontal fit.’ Begin at left column reading downwards until current ambulation is determined, then, read across to next and downwards until each column is determined. Thus, ‘leftward’ columns take precedence over ‘rightward’ columns. Also, see ‘definitions of terms’ below.

Definition of Terms for PPS

As noted below, some of the terms have similar meanings with the differences being more readily apparent as one reads horizontally across each row to find an overall ‘best fit’ using all five columns.

1. Ambulation (Use item Self-care to help decide the level)
   - Full — no restrictions or assistance
   - Reduced ambulation — degree to which the patient can walk and transfer with occasional assistance
   - Mainly sit/lie vs Mainly in bed — the amount of time that the patient is able to sit up or needs to lie down
   - Totally bed bound — unable to get out of bed or do self-care

2. Activity & Evidence of Disease (Use Ambulation to help decide the level.)
   - Activity — Refers to normal activities linked to daily routines (ADL), housework and hobbies/leisure.
   - Job/work — Refers to normal activities linked to both paid and unpaid work, including homemaking and volunteer activities.
   - Both include cases in which a patient continues the activity but may reduce either the time or effort involved.

Evidence of Disease
   - No evidence of disease — Individual is normal and healthy with no physical or investigative evidence of disease.
   - ‘Some,’ ‘significant,’ and ‘extensive’ disease — Refers to physical or investigative evidence which shows disease progression, sometimes despite active treatments.

   Example 1: Breast cancer:
   - Some = a local recurrence
   - Significant = one or two metastases in the lung or bone
   - Extensive = multiple metastases (lung, bone, liver or brain), hypercalcemia or other complication

   Example 2: CHF:
   - Some = regular use of diuretic &/or ACE inhibitors to control fluid
   - Significant = exacerbations of CHF, effusion or edema necessitating increases or changes in drug management
   - Extensive = > 1 or more hospital admissions in past 12 months for acute CHF & general decline with effusions, edema, SOB
